

SomudTick - drilling template: FRONT FACE (the flat bottom of the clear box D384)

print at 100 % (Actual size, no 'fit to page'). The line at the bottom must measure 100 mm.

Cut out along the outer outline, tape it on the face, lay the boards on it to check, then mark the centres (+) and drill.

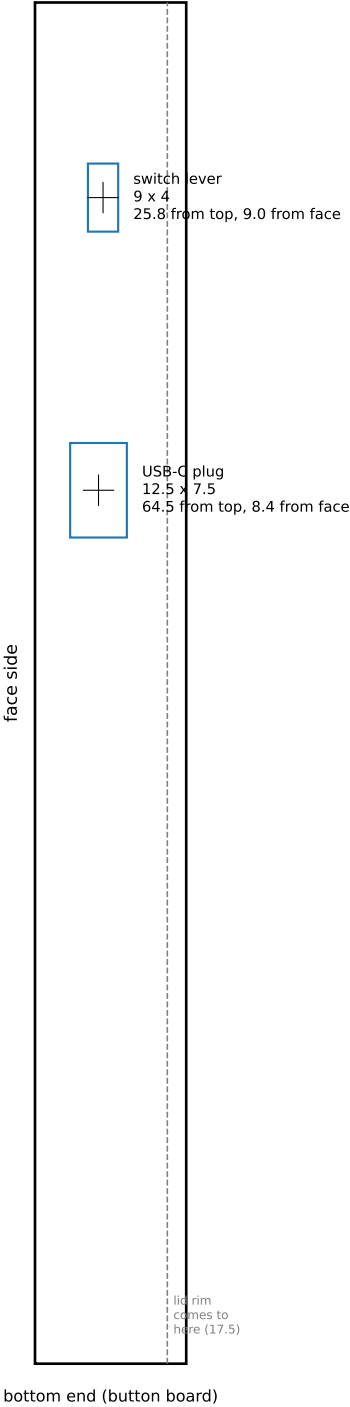

blue = openings red = screw holes (3.2) gray dashed = where the boards sit behind dotted = inside of the walls

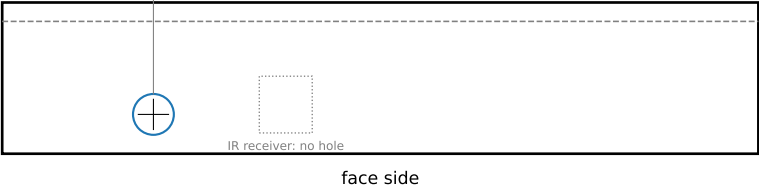

100 mm

SomudTick - drilling template: WALLS (1:1)

top end (small screen)
LEFT wall (the hinge side)

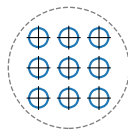

IR LED (round 5.4): 20.0 from left, 5.2 from face
TOP wall (seen from above, face side down)

Clear box D384: 180 x 100 x 25, walls 1 mm, body 20 + lid 7.5.
Holes in the walls stay below the dashed line
(the lid's rim covers the wall above it).
PP plastic: drill slowly, clean the soft edge with a knife.

SomudTick - drilling template: LID (seen from the BACK, outside of the lid)

Top of the page = the end with the small screen. Only the speaker grille (the hinge is on the RIGHT as you see the lid from behind).

speaker grille: 7 holes 2.5 mm
centre 30.0 from the left edge, 54.0 from the top
(as you look at the BACK)
